I am educated and experienced in both IT and the educational fields. I have master's degree in computer science from Thailand plus MIS and Special Education from Australia. In addition, I am a licensed teacher and special educator in Sweden and have teaching experiences in both online and offline, both children and adult education. Therefore, I am looking for a challenging job that can give me opportunities to share my knowledge, abilities and skills to develop both me and the organization.

Chief of Computer Department and System Analyst

Bangkok Rubber Public Co, Ltd., Bangkok, Thailand 1987 - 1999

I have started my career as a programmer using COBOL based on mini computer and mainframe computer. My main responsibilities were in Payroll system. After a few years I have developed myself and my skills to work as a system analyst and responsible for maintenance, development and implementation of many complex IT systems such as Inventory Control System, General Ledger System, Account Payable System, Account Receivable System, Purchasing System, Customer Order System, Material Requirement Planning System, Bill of Material System and Payroll System.
